HYBRID RHODODENDRON

New HYBRID RHODODENDRONS

The aristocrats of broad-leaf evergreen shrubs. Ideal for foundation planting on the east or north side of the house, or for specimen or group plantings, in any partially shaded location. They require acid soil, and it is always best to mix a liberal amount of peat moss or rotted oak leaves into the soil at the time of planting, and to add a mulch of leaves or peat moss—a little each year, preferably in the fall. This will furnish the proper soil condition that they need. At maturity, these handsome shrubs will attain a height of 4 to 6 feet. Plants offered are grown from seed of the finest new reds. No doubt, of course, that they will show some variations in color; therefore, the plants offered are not guaranteed as to color, but whatever color you get, it will be fascinating and most beautiful. 3-yr.-old, transplanted plants, 10 to 12 in. high, \$2.00 each; 2 for \$3.50; 4 for \$6.00; 12 for \$15.00.
